Environmental Policy

We recognize that virtually all the activities of an organization or an individual have some impact on the environment. Our aim is to reduce the impact of our own organization through a programme of continuous improvement.

Our commitment to the environment is extended to all our practices.

- Comply with current legislation and, where practical
- Integrate environmental objectives into relevant business decisions in a cost-efficient manner
- Require all colleagues to address environmental responsibilities within the framework of normal operating procedures
- Minimize waste, also seek to recover as much as is economically practical and ensure the remainder is disposed of responsibly
- Influence suppliers/ clients to reduce their impact on the environment
